Re: Opportunity Class Practise Test Papers

Attached are three practise OC test papers:

1. Mathematical Reasoning;
2. Reading; and
3. Thinking Skills

To practise, read the front cover of the test. Set a timer for the minutes allowed so your student gets a feel for the time pressure they will be under during the exams.

Answers have been included so you can review your student's responses when they have finished.

For each applicant, class teachers need to prepare a supporting report based on in-class assessments (this information is sent directly to the external convenors). After completing the practise tests you decide you do not want to proceed with your student's OC application, please contact the school to let us know so that teachers are not preparing unnecessary documentation.

Likewise, if you have any questions about the OC process, please call the school and I will contact you promptly.

Kind regards

Lara Lenton
