

# Wyoming Public School

## Works notification

**25 October 2021**

Dear parents/carers,

Upcoming maintenance at Wyoming Public School will require working with asbestos containing material. Testing conducted by an independent hygienist has confirmed that the material is bonded asbestos, which means it is attached to other material such as cement or vinyl and cannot be crumbled by light pressure.

Safety measures and monitoring have been put in place to ensure there is no risk to students, staff or the local community. As a precaution, the area has been cordoned off and will remain out of bounds to students and staff until remediation is completed.

The material is scheduled to be removed from the window fittings of Block D Room 17 on Saturday 30 October 2021. All asbestos containing material will be removed outside of school hours.

Testing will be completed to ensure the area has been fully remediated. The school will receive a clearance certificate before the area is open to students and staff.

A comprehensive COVID-19 Safety Plan will be in place for the site and the contractor will enforce strict compliance. Our construction sites will follow all current health guidelines, including a one person per 4sqm rule in necessary and all workers wearing masks for indoor and outdoor work.

Safety is the number one priority for School Infrastructure NSW and we are following all health advice in relation to construction sites.

The health, safety, and well-being of the school and the local community is our highest priority and we will continue to keep the community updated.
