## MATHS DAY Thursday 4 August

At Wyoming Public School, we are celebrating Education Week with a special educational experience involving maths. With the theme of 'creating futures – education changes lives', students will experience how mathematics is an important life skill.

The final arrangements for the day are set out below.

There are two sessions and families are welcomed to attend. One session will be classes participating in interesting maths activities with their teacher and the other session, for students that have paid, is run by a company "World of Maths".
