MATTER MATTERS!

How do we organise things?

Complete the 5 questions below then try the bonus question at the end.

Question 1. Follow the link to explore states of matter then complete the word sort game: www.inquisitive.com/interactive/1825-states-of-matter

Question 2. Write your own definitions for the following words. If you do not know a word, look it up in the dictionary or online at www.collinsdictionary.com.

compress -

liquid -

properties -

gas -

matter -

solid -

Question 3. Properties can be used to sort objects into groups. Using the word bank below, list the properties that each group has in common using the dot points provided.

metal	elastic	rigid	opaque	heavy
plastic	inelastic	flexible	transparent	light

Group 1

aluminium foil

car parts

water tanks

coins

Group 1 properties:

-
-
-
-
-

Group 2

pipe cleaners

blu tack

eraser

pool noodles

Group 2 properties:

-
-
-
-
-

Question 4. Sort these nine objects into three groups of three so that all the objects in each group have a common property. Write the common property for each group.

stop sign

honey

window

fish tank

tomato

empty jar

post box

glue

chewing gum

Group 1	Group 2	Group 3
<ul style="list-style-type: none">•••	<ul style="list-style-type: none">•••	<ul style="list-style-type: none">•••
Property:	Property:	Property:

Question 5. Look at the following substances, then click on the boxes to tick which state of matter you would describe it as. *Could any be more than one state of matter?*

FRACTIONS, DECIMALS & PERCENTAGES

Fractions to decimals

This form is automatically collecting emails for NSW Dept of Education users. [Change settings](#)

CONVERTING - This clip goes for 6:43mins but will help

No calculator today - try the below questions using the example seen here

No Calculator? Use [Long Division to Decimal Places](#)

Example: here is what long division of $\frac{5}{8}$ looks like:

$$\begin{array}{r} 0.625 \\ 8 \overline{) 5.000} \\ \underline{0} \\ 5.0 \\ \underline{4.8} \\ 20 \\ \underline{16} \\ 40 \\ \underline{40} \\ 0 \end{array}$$

In that case we inserted extra zeros and did $\frac{5.000}{8}$ to get **0.625**

Read the [Long Division to Decimal Places](#) page for more details.

Sentence A Day

<https://www.youtube.com/watch?v=MPGhEJicbC4>

An **adverb** is a word used to tell more about a verb, and it almost always answers the questions how?, when?, where?, how often?, and in what way?. Words like slowly, loudly, carefully, quickly, quietly or sadly are all adverbs. Adverbs usually, but not always, end in -ly.

An **adjective** is a word that describes a noun. Words that describe sounds, shapes, sizes, times, numbers/quantity, textures/touch, weather are all examples of adjectives. An **adjective** is a kind of **word** that modifies a **noun**. Nouns are words that **name** a place, a person, a thing, or an idea. An adjective is a word that gives more information about the noun that goes with it. It is a **part of speech**. Adjectives are something that describes something and makes the thing sound better.

Monday If I could be an animal, I would be a...

Tuesday If I could talk to anyone in the world it would be....and I would ask them....

Wednesday The best movie I ever saw was....I thought it was good because....

Thursday What I like doing best on my birthday is.....

Friday When I want to relax, I like to.....

Challenge
Can you add different types of sentences in your paragraph?

THINK
The Most Important Thing
You need to write down the most important thing that you learnt during this activity.

Paragraphs have a topic sentence and every other sentence in the paragraph provides more information about the topic sentence.

Fractions to dec with calculator

This form is automatically collecting emails for NSW Dept of Education users. [Change settings](#)

CONVERTING - This clip goes for 4mins but will help

You can use a calculator to help work out the below answers

The simplest method is to use a calculator.

Just divide the top of the fraction by the bottom, and read off the answer!

Example: What is $\frac{5}{8}$ as a decimal ... ?

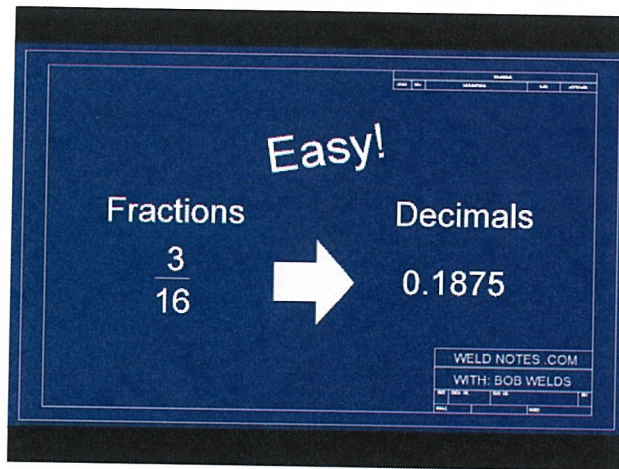

... get your calculator and type in "5 / 8 ="

The answer should be **0.625**

This is exactly how to type it into your calculator

1 *

Express $\frac{8}{25}$ as a decimal

Short answer text

2 *

Express $\frac{17}{20}$ as a decimal

Short answer text

3 *

Express $\frac{5}{8}$ as a decimal

Short answer text

4 *

Express $\frac{11}{16}$ as a decimal

Short answer text

5 *

Express $\frac{17}{40}$ as a decimal

Short answer text

6 *

Express $\frac{19}{125}$ as a decimal

Short answer text

7 *

Express $\frac{4}{5}$ as a decimal

☐ 0.400

☐ 0.444

☐ 0.414

☐ 0.490

8 *

Express $\frac{3}{7}$ as a decimal correct to 3 decimal places

☐ 0.425

☐ 0.429

☐ 0.427

☐ 0.431

Read each editing passage and rewrite the correct punctuation below.

11

Dad's New Car

i knew today was the day dad was getting his new car the add only showed picters of the bass model, so he decided to add some extrars i couldn't wait to see it only one more hour until he was coming home then he could take our family for a ride

Alliteration

The bear was as busy as a bee.

The repetition of the beginning consonant sounds in words.

Created by
S4Education
2018

- ❖ Garry gathered the garbage.
- ❖ Lazy lizards lying like lumps!
- ❖ Peter Piper picked a peck of pickled peppers.
- ❖ The sly, slithering snake snuck into the shed.
- ❖ Ollie's owl owns orange ostriches.
- ❖ The river rushed rapidly over the rocks. .

EXAMPLES

Watch this clip

<https://www.youtube.com/watch?v=xXBTyBeEJYM>

Alliteration is a figurative device. It is used in writing to get the reader's attention and provide a rhythm. Look at the examples above and below, then write 3 examples of your own.

- eg:
1. snow squishes softly
 2. tasty tomatoes tickle taste buds
 3. pink polyester pyjamas prickle

Your turn

Decimals to Fractions

This form is automatically collecting emails for NSW Dept of Education users. [Change settings](#)

Fractions to decimal clip

$$0.35 = \frac{7}{20}$$

Mathmeeting.com

We are converting Decimals to Fractions today

To convert a Decimal to a Fraction follow these steps:

- **Step 1:** Write down the decimal divided by 1, like this: $\frac{\text{decimal}}{1}$
- **Step 2:** Multiply both top and bottom by 10 for every number after the decimal point. (For example, if there are two numbers after the decimal point, then use 100, if there are three then use 1000, etc.)
- **Step 3:** Simplify (or reduce) the fraction

Example: Convert 0.75 to a fraction

Step 1: Write down 0.75 divided by 1:

$$\frac{0.75}{1}$$

Step 2: Multiply both top and bottom by **100** (because there are 2 digits after the decimal point so that is $10 \times 10 = 100$):

$$\begin{array}{c} \times 100 \\ \frac{0.75}{1} = \frac{75}{100} \\ \times 100 \end{array}$$

(Do you see how it turns the top number into a whole number?)

Step 3: Simplify the fraction (this took me two steps):

$$\begin{array}{c} \div 5 \quad \div 5 \\ \frac{75}{100} = \frac{15}{20} = \frac{3}{4} \\ \div 5 \quad \div 5 \end{array}$$

$$\text{Answer} = \frac{3}{4}$$

1. Express 0.10 as a fraction in its lowest terms. *

- ☐ 1/10
- ☐ 1/100
- ☐ 10/1000
- ☐ 1/5

2. Express 0.25 as a fraction in its lowest terms. *

☐ 25/1000

1/4

☐ 25/10

☐ 2/5

3. Express 0.50 as a fraction *

☐ 5/100

☐ 50/1000

☐ 5/5

☐ 1/2

4. Express 0.85 as a fraction in its lowest terms. *

☐ 17/20

☐ 17/25

☐ 19/20

☐ 19/25

5. Express 0.64 as a fraction in its lowest terms. *

☐ 3/5

☐ 4/5

☐ 16/25

☐ 17/25

6. Express 0.375 as a fraction *

- ☐ 37/100
- ☐ 19/50
- ☐ 3/9
- ☐ 375/1000

7. Express 0.825 as a fraction *

- ☐ 7/8
- ☐ 31/40
- ☐ 4/5
- ☐ 825/1000

8. Express 0.425 as a fraction *

- ☐ 21/50
- ☐ 425/1000
- ☐ 9/20
- ☐ 19/40

Read each editing passage and rewrite the correct punctuation below.

13

So Many Choices

there are so many countrys in the world
that i would love to visit if my bags were
packt i could jump on an aircraft and
leave tomorrow i could visit mountains
vallies islands deserts and oases

Find 4 spelling mistakes.
Add 5 capital letters, 3 full stops and 4 commas.

Thursday - Rewrite the passage above with correct Punctuation

Start here -

Let's Take A Trip to.....

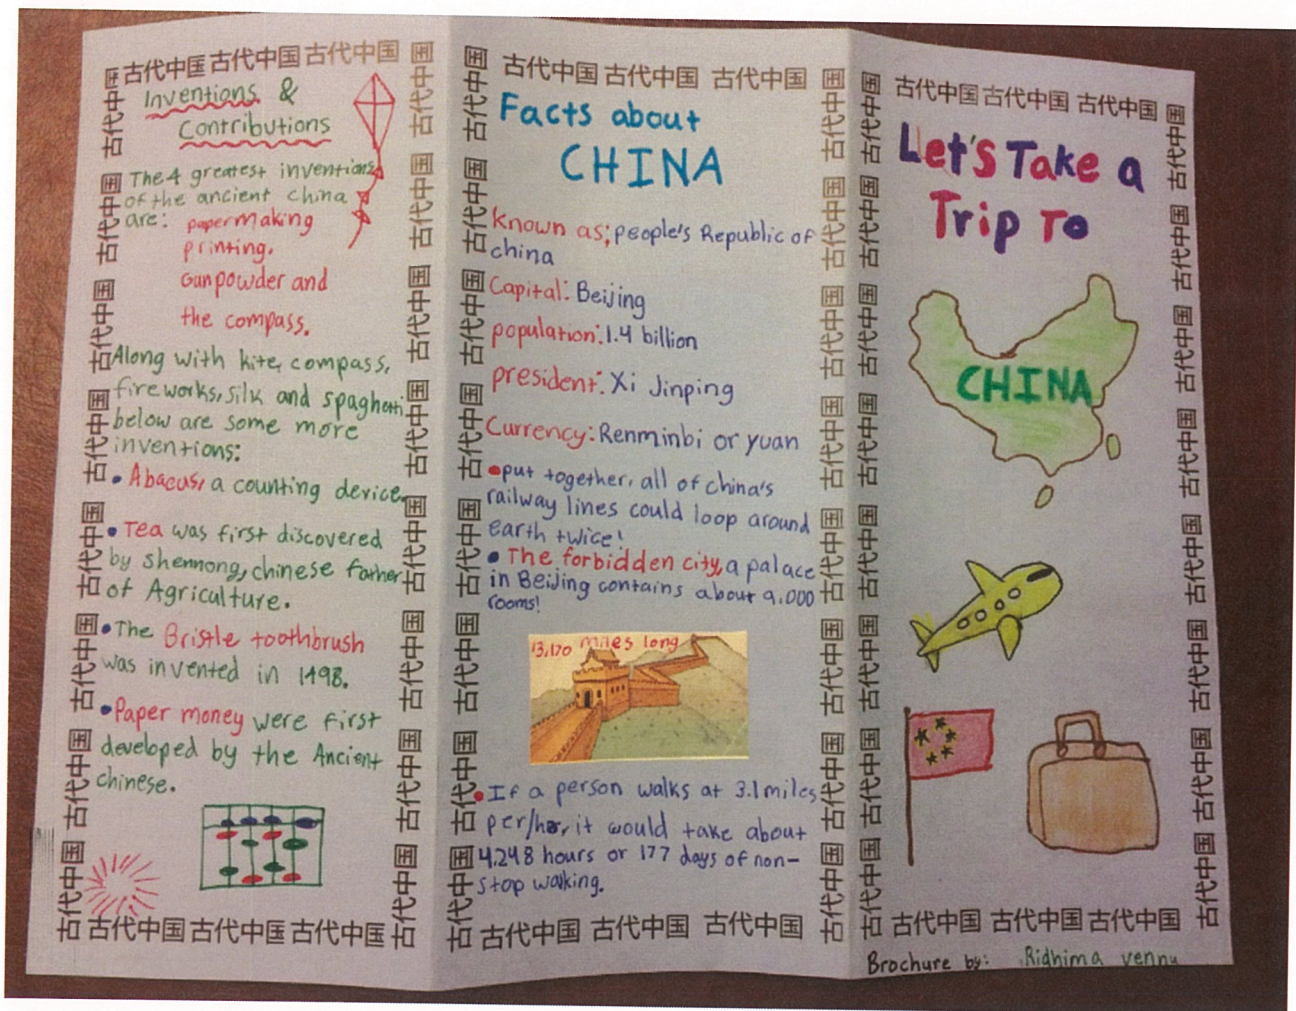

This is compulsory. You will work on it over the next few weeks either at home or when we get back to school.

Part A - Individual task

Your job is to create a travel brochure titled **Let's Take A Trip To.....**

1. Research one country in the Asia region.
2. Include in your brochure:
 - Major towns and cities
 - Geographical features i.e mountains, rivers, desert
 - Tourist attractions/events
 - Population
 - Climate
 - Religion/Culture
 - Food
 - Celebrations
 - Traditional Clothing

See below for brochure examples

Geography

There are two big rivers in China. The Huang He river and the Yangtze river. The Yangtze river has a dam called the Three Gorges Dam. The dam is the largest hydroelectric power source in the world.

Best time to visit China is spring & fall.

China is the third largest country in the world by area.

Earthquake Detector

World's first seismograph, an instrument to detect earthquakes was invented by Zhang Heng.

Inside the Chinese seismograph there was a pendulum that swings when there is an earthquake. Which set of levers inside the seismograph which knocks the balls out of the dragons' mouths and into the roads' mouths. Then the roads makes sound and alarm the people.

Zhang's seismoscope was a giant bronze vessel.

Compass

During Han dynasty, the ancient Chinese compass was made from iron oxide, a mineral ore. Iron oxide is also known as lodestone and magenta. The lodestone was carved into the shape of a spoon.

Compass was invented to help people find their way while traveling.

It was developed for aligning buildings with directions.

It is also used as a tool in fortune telling.

Phuket, Thailand

The weather here is perfect for a holiday. The weather is sunny and hot. It is a great place to visit. The weather is perfect for a holiday. The weather is sunny and hot. It is a great place to visit.

Sentence A Day

<https://www.youtube.com/watch?v=MPGhEJicbC4>

An **adverb** is a word used to tell more about a verb, and it almost always answers the questions how?, when?, where?, how often?, and in what way?. Words like slowly, loudly, carefully, quickly, quietly or sadly are all adverbs. Adverbs usually, but not always, end in -ly.

An **adjective** is a word that describes a noun. Words that describe sounds, shapes, sizes, times, numbers/quantity, textures/touch, weather are all examples of adjectives. An **adjective** is a kind of **word** that modifies a **noun**. Nouns are words that name a place, a person, a thing, or an idea. An adjective is a word that gives more information about the noun that goes with it. It is a part of speech. Adjectives are something that describes something and makes the thing sound better.

Monday If I could be an animal, I would be a...

Tuesday If I could talk to anyone in the world it would be...and I would ask them....

Wednesday The best movie I ever saw was...I thought it was good because....

Thursday What I like doing best on my birthday is.....

Friday When I want to relax, I like to.....

Challenge
Can you add different types of sentences in your paragraph?

THINK
The Most Important Thing
You need to write down the most important thing that you learnt during this activity.

Paragraphs have a topic sentence and every other sentence in the paragraph provides more information about the topic sentence.

MATTER MATTERS!

Investigation: Easy Squeasy

One property that we use to sort matter is whether it can be **compressed** or not. We **compress** a substance when we make it smaller by force. **Compressing** matter lowers its volume by making it take up less space. Follow the steps below to find out which states of matter can be **compressed**.

To begin your investigation, you will need:

- ☐ A soft plastic bottle with lid
- ☐ Water
- ☐ Sand

IMPORTANT!

- Make sure the bottle doesn't have hard sides. You need to be able to **compress** what's inside by squeezing the bottle.
- If you do not have a suitable bottle, think about what you could use instead. Any sealed container you can squeeze will do, such as a zip-lock bag.

Step 1: Empty the bottle. Despite being empty, it will still be full of matter - **air**! Screw the lid on tight so no air can escape.

Step 2: Squeeze the bottle hard to see if you can **compress** it into a smaller shape.

Step 3: Select one answer below. The air inside is a **gas**. Can a **gas** be **compressed**?

- ☐ **Yes**, a gas can be compressed.
- ☐ **No**, a gas cannot be compressed.

Step 4: Fill the bottle with water then screw the lid on tight. Make sure it is completely filled and that you cannot see any air still trapped in the top. The bottle is now filled with a different state of matter - **liquid**!

Step 5: Squeeze the bottle again to see if you can **compress** it.

Step 6: Your bottle (or bag) might twist or skew, but that is different to **compressing**. If you squash it flatter but the sides become wider, that is **not** lowering its volume by making it take up less space - it is only making it into a different shape, like playdough. With that in mind, select one answer below. Can a **liquid** be **compressed**?

- ☐ **Yes**, a liquid can be compressed.
- ☐ **No**, a liquid cannot be compressed.

Step 7: Empty the water bottle and fill it with sand then screw the lid on tight. Just like with the water, make sure it is completely filled and that you cannot see any air still trapped in the top. The bottle is now filled with a different state of matter - **solid**!

Step 8: Squeeze the bottle again to see if you can **compress** it.

Step 9: Just like with the water, remember that your bottle might twist and skew but that is different to **compressing**. With that in mind, select one answer below. Can a **solid** be **compressed**?

- ☐ **Yes**, a solid can be compressed.
- ☐ **No**, a solid cannot be compressed.

Step 10: Write a conclusion and reflect on this investigation below. **Which states of matter can be compressed? What worked for your investigation and what didn't?** Use full sentences and make sure you mention all three states of matter - solid, liquid, and gas.

FRACTIONS, DECIMALS & PERCENTAGES

Percent to decimals

This form is automatically collecting emails for NSW Dept of Education users. [Change settings](#)

Converting percent to decimal

Converting From Percent to Decimal

Percent means "per 100", so **50%** means 50 per 100, or simply $\frac{50}{100}$

When we divide 50 by 100 we get **0.5** (a decimal number).

So, to convert from percent to decimal: divide by 100, and remove the "%" sign.

The Easy Way

The easy way to divide by 100 is to **move the decimal point 2 places to the left**, so:

From Percent		To Decimal
75%	0.75	0.75
move the decimal point 2 places to the left, and remove the "%" sign		

Examples converting percent to decimal

Example: Convert 8.5% to decimal

Move the decimal point two places to the left: $8.5 \rightarrow 0.85 \rightarrow 0.085$

(Note how we inserted an extra "0" as needed)

Answer **8.5% = 0.085**

Example: Convert 250% to decimal

Move the decimal point two places to the left: $250. \rightarrow 25. \rightarrow 2.5$

Answer **250% = 2.5**

1. Convert 37.5% to a decimal *

- ☐ 37.5
- ☐ 3.75
- ☐ 0.375
- ☐ 0.0375

2. Convert $64\frac{1}{2}\%$ to a decimal *
