Making Bread

Making a loaf of bread is easier than you might think. All you need is flour, water, yeast, and a pinch of sugar. The first step is to dissolve the yeast in water with a little sugar. The yeast needs the sugar to help make the dough rise. Next, you add flour and stir to make a dough. Then you put the dough on a floured surface and **knead** it with your hands for several minutes until it's no longer sticky. After that, the dough has to rest for about an hour. During that time, the dough rises and expands. Lastly, you put the bread in a pan and pop it in the oven to bake. *Mmmmm!*

KEY QUESTIONS

- 1. SEQUENCE:** What is the first step to making bread?
- 2. SEQUENCE:** What is the last step in making bread?
- 3. TEXT EVIDENCE:** What happens while the dough is resting? Cite the text.
- 4. CONTEXT CLUES:** What do you think *knead* means?
☐ bake
☐ cool
☐ pound
- 5. S-T-R-E-T-C-H:** Have you ever baked something? Tell about it.

Informative Writing Task – What Causes the Seasons?

Explanation texts describe how and why something works, or how and why an event occurs.

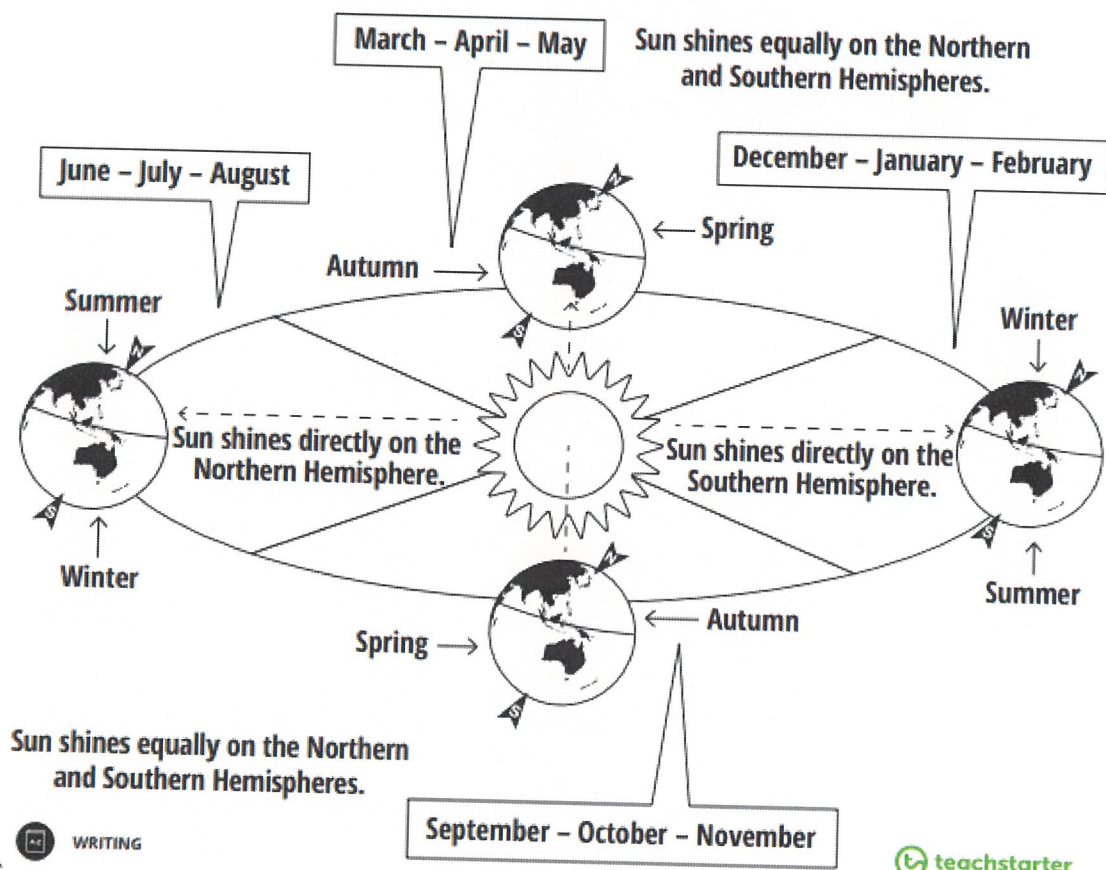

You are going to write an explanation text called What Causes the Seasons?

You will need to:

Plan a draft to begin by

- researching this topic
- recording dot-point notes
- writing your text in complete sentences.

This diagram is a visual representation of the seasons. It has been included to help you understand the process and to stimulate some initial ideas for your writing.

Before writing your explanation text, you will need to research **What Causes the Seasons?**

Start your writing in the 3 sections below. This is research information NOT MADE UP.

1 paragraph equals approximately 6 sentences

Title: **What Causes the Seasons?**

Introduction (1 paragraph 6 sentences- Provide a detailed overview of **What Causes the Seasons**)

Description (2 paragraphs 12 sentences- Provide a series of paragraphs that explain the 'how' and the 'why' the Respiratory System Works)

Conclusion (1 paragraph 6 sentences- Provide a detailed conclude finishing the informative writing)

When you have completed the Intro, Description and Conclusion (Each section must have 6 or more sentences, then you are to turn-in your document. Due on Thursday

Solar System

1. 'The Jetsons' was a cartoon that was made before Neil Armstrong landed on the moon. Mrs Head loved watching it growing up! Watch the clip below.

<https://www.youtube.com/watch?v=cnWDXA4MQHE>

Imagine moving to another planet in the solar system.

2. Name your planet and describe its location and main features.

Solar System

3. Imagine what you would need to survive on this planet. Brainstorm a list of items and equipment you would need to take from Earth to live on this planet. Think about why you would need this item. Remember, the sky's the limit!

INFO TEXT: SEQUENCE OF EVENTS

Rihanna's Dress

The singer Rihanna once wore a dress that took two years to make! It was created by Guo Pei, one of the most famous designers in China. To get started, Pei took Rihanna's measurements. Next, Pei picked out a fabric for the dress. Then, she spent two whole years **meticulously** sewing it by hand. Rihanna's dress was gold-colored with fur and a long train that dragged across the floor.

The dress weighed 55 pounds! Rihanna wore it to a ball in New York City in 2015. It was a big hit for Rihanna and for Pei, too.

KEY QUESTIONS

- 1. SEQUENCE:** What was the first step in making Rihanna's dress?
- 2. SEQUENCE:** After taking Rihanna's measurements, what did the designer do?
- 3. DETAILS:** What country is Guo Pei from?
- 4. VOCABULARY:** What do you think *meticulously* means?
☐ very carefully
☐ very loudly
☐ very stylishly
- 5. S-T-R-E-T-C-H:** What would you enjoy meticulously working on for two years? Tell about it.

What a Life!

The life of a 17-year cicada is an amazing journey. When an adult female is ready, she lays hundreds of eggs in a branch of a tree. About eight weeks later, the eggs hatch. The newly hatched nymphs fall to the ground. Then they **burrow** about a foot underground. That spot is where they stay for the next 17 years, feeding on the sap of the tree's roots. When 17 years have passed, the cicadas emerge from the ground by the thousands. As they climb the very tree where they hatched 17 years earlier, they shed their outer skins. Then they're ready to begin the cycle all over again!

KEY QUESTIONS

1. **SEQUENCE:** What happens first in the 17-year cicada's life cycle?
2. **SEQUENCE:** What do the nymphs do after they fall to the ground?
3. **INFERENCE:** Why are these insects called "17-year cicadas"?
4. **CONTEXT CLUES:** What do you think *burrow* means?
☐ dig down
☐ loan
☐ wait
5. **S-T-R-E-T-C-H:** Would you like to be present when the cicadas emerge from the ground? Why or why not?

INFO TEXT: SEQUENCE OF EVENTS

Write On!

Would you like to write fiction? First, brainstorm until you come up with a really great story idea. Then write a first draft. This draft might be kind of messy, but it's good to get the basic story down in writing. Next, edit your draft. The editing stage is the chance to make important changes. Maybe you want to change a character, or perhaps you've thought of a great new twist for the ending. Keep editing your piece of fiction until it's polished. Last, but not least, proofread your work to make sure the grammar and spelling are perfect. **Voila!** Now, you have a story. Don't forget to share your story with friends and classmates.

KEY QUESTIONS

1. **SEQUENCE:** What is the first step in writing fiction?
2. **SEQUENCE:** What is the last step in writing fiction?
3. **MAIN IDEA:** What is the main idea of this passage?
4. **CONTEXT CLUES:** What do you think *Voila!* means?
☐ Write on!
☐ So sorry!
☐ There it is!
5. **S-T-R-E-T-C-H:** What is your favorite step in the writing process? Why?

MEASURING LENGTH

Form description

CLIP ABOUT MEASURING

*****Please only give a number not the unit of measurement for the answer**** example 6cm = __ mm. The answer you provide is 60 (number only)

Description (optional)

1. Convert these measurements to the length unit given. 200cm = __ m

Short answer text

2. Convert these measurements to the length unit given. 700cm = __ m

3. Convert these measurements to the length unit given. 2 000m = __ km

Short answer text

4. Convert these measurements to the length unit given. 6 000m = __ km

Short answer text

5. Convert these measurements to the length unit given. 4 000mm = __ km

Short answer text

6. Convert these measurements to the length unit given. 6km = __ m

Short answer text

7. Convert these measurements to the length unit given. 1km = __ m

Short answer text

8. Convert these measurements to the length unit given. (eight and a half) 8 1/2km = __ cm

Week 9

Sentences
A simple sentence expresses one thought. It has one subject and one verb (or verb group).

Did you remember your capital letter, full stop and one or more adjectives in your sentence?

Steph Woods 2019

I am a sentence builder!

I can write a sentence that is interesting using various tools that I know.

Use this image as an inspiration to write a sentence beginning with

My favourite possession is.....because.....

Challenge:
Can you write a sentence that is interesting? Can you use a common noun, proper noun, adjective, action verb, and an adverb, in your sentence? Can you write a complex or compound sentence?

Write **a sentence** that is interesting. Use the image for inspiration.
We are looking for adjectives, adverbs, compound or complex sentences.

Finish today's sentence

My favourite possession isbecause...

How Bees Make Honey

You probably know that bees make honey, but how exactly do they do it? It all starts with flowers. When a honeybee lands on a flower, it drinks in the flower's nectar—a sweet juice at the flower's center. The bee stores the nectar in its stomach. Then it moves on to more and more flowers. Once its stomach is completely full, it flies back to the hive. There, it **regurgitates** the nectar from its stomach. Other bees quickly flap their wings, which helps draw out excess moisture from the nectar, creating honey. Finally, the honey is put into a honeycomb made of beeswax.

KEY QUESTIONS

1. **SEQUENCE:** What's the first thing a bee does in order to make honey?
2. **SEQUENCE:** What is the final step in the honey-making process?
3. **AUTHOR'S PURPOSE:** Is the author's purpose to inform or persuade you?
4. **CONTEXT CLUES:** What do you think *regurgitates* means?
 - ☐ swallows
 - ☐ spits up
 - ☐ flies
5. **S-T-R-E-T-C-H:** How do honeybees help people? How can they hurt people? Tell about it.
